4. Questions
   a. When is the `<html lang="en">` necessary? It wasn't flagged when I didn't include it; however, I noticed other people were getting flagged for not including it. Is this just something that I should include every time?
   b. The hardest part of the lab for me was making it so that the image directly clicked to the link. For some reason this took me the longest amount of time but I eventually figured it out.
   c. My level of comfort with the content is 2.
